What is CUEVATUR?

The **Congress on Spanish Tourist Caves**, a must for professionals in the world of subsurface tourism, celebrates its eighth edition in the Andalusian town of Pulpi. CUEVATUR is the meeting point and exchange of experiences of subsurface tourism professionals, a sector that has become an important sector of sustainable tourism and nature and heritage, as well as a way to revitalize regions, mostly rural, through the use of natural and cultural heritage of our subsoil.

As in previous years, **CUEVATUR** will be a forum where the latest works, studies and research carried out in Spanish, European and Latin American caves and mines will be exhibited, bringing together a large number of scientists and researchers from the fields of geology, paleontology, archaeology, engineering and tourism, among other disciplines. Therefore, its more than 300 papers, gathered in the Proceedings of the different editions of the Congress held, make up an essential collection for scholars of subsurface tourism.

CUEVATUR is the place for the **exchange of experiences and knowledge** of the managers of tourist caves and mines, but also the point of reference for those responsible for the opening of new caves for tourist use, because it brings together the leading experts in tourist caves and mines.

Second Newsletter

Venue and dates

The Congress will take place in **Pulpi** (Almeria), from 19th. to 22nd. October 2022 and the sessions will be held at:

ESPACIO ESCENICO DE PULPI
Plaza Espacio Escenico s/n
Tlf. +34 950 464 001
espacioescenicopulpi@gmail.com

Pulpi

The city chosen for this edition of CUEVATUR is the first town on the Andalusian coast by the **Mediterranean**, framed on the borders of Murcia and Almeria and is one of the most picturesque and paradisiacal landscapes of our geography.

Composed of five districts, the coastal town of **San Juan de los Terreros** stands out for its unique beauty; reefs, cliffs, coves, beaches and places with a magical charm such as the fossil beach of the Nardos or the Cala de los Cocedores, boast a surprising natural heritage.

Second Newsletter

Pulpi

It deserves a special visit its castle, **defensive endowment of the XVIII century** that today stands majestic as Center of Interpretation of the Littoral and as watchtower of luxury from which to contemplate the bay of Terreros, and one of the most beautiful sunsets of the **Mediterranean**. From there we can see the attractive rock formations of the municipality and enjoy a bird's eye view of its two islands (Isla Negra and Isla de Terreros), both Natural Monument.

In the foothills of the **Sierra del Aguilón** is the magnificent mining enclave of Pilar de Jaravía that stands out for its Mina Rica and the impressive Geode de Pulpi, an essential visit for lovers of natural wonders. In the inland area, famous for its seasonal crops, we can enjoy in Pulpi the Church of San Miguel and its spectacular Altarpiece, the Merendero de Benzal, the Mirador del Apartadero, the Botanical Garden of La Fuente,... and the recently inaugurated, Scenic Space of Pulpi where you can find the Hall of the local painter Pedro Antonio and the Hall of luminescent minerals, whose size and content make it one of the most complete in Europe.

Festivals, **traditions** such as the Bull of Fire or the Day of La Vieja, its gastronomy and, above all, its people, make Pulpi an unrepeatable destination and a pleasure for the senses.

Second Newsletter

Characteristics of the congress

It will consist of sessions distributed over the four days of the congress, with the presentation of scientific and technical papers, poster sessions with short presentations, guest lectures and other official and social events. There will also be short excursions during the congress days, with visits to the Mina Rica and Geoda de Pulpí among others, as well as post-congress excursions.

Official languages

The official language of the congress will be **Spanish**. Exceptionally, depending on the origin of the authors of the papers and posters, papers or posters in English, Portuguese and French may be accepted.

Exhibitions

During the Congress there will be exhibitions, which will be held in the two Congress venues, on the themes:

- "Exhibition of the Spanish Museum of Speleology".
- "The Esparto: Tradition in the rural world of the Levant".
